CQ offers the Satellite WAZ award for stations who confirm a minimum of 25 zones worked via amateur radio satellite. Records for Satellite WAZ are not complete. What's missing for the majority of callsigns on the list is the zones that each station needs to reach the 40-zone mark.

To date, only one station (N6KK) has managed to confirm all 40 zones via satellite. Joe Barger, N6KK, accomplished this incredible feat via AO-13 with QSOs made from 1989 to 1993. We're certain that the "window" of opportunity for many of the QSOs was very short, with both stations having only a precious few minutes to make the contact.

If you think about it, this is a darned tough award! Reaching the 25-zone level takes coordination, dedication, and skill. You have to do your homework to figure which orbits offer the best opportunities to work those far-off zones. Working WAZ via satellites doesn't take huge antennas or lots of power, though.

How many of you satellite ops have reached the 25-zone threshold? Let's see some more applications for Satellite WAZ!
